

The Cash Express

Deposit

Datasheet

QCashAccSys
Cash Management Systems

The Cash Express is a secure on-line banknote deposit terminal.

The Cash Express is a single-feed note acceptor and accepts bank notes irrespective of their denomination and face value. Notes are counted and validated at a rate of 2 notes per second and dropped into the safe and the teller is issued with a receipt.

The Cash Express is linked with the CashAccSys software or CR Link system that supports all POS systems.

The Cash Express is the ideal product to be mounted on a truck or bus as a banknote deposit and validate system.

The device transmits the deposit data in XML format via a TCP/IP connection. All transactions are stored electronically on the device for a minimum period of 36 months to provide the client with current, as well as historical information.

Key Features

- Secure cash receiving terminal
- Easy reconciling of cash takings
- 7" touch screen – XML ready
- Full counterfeit validation
- Low Jam rate
- Detailed receipt print-out
- Anti-tamper bag design

General Specifications
